EU PRODUCTION: APRIL 2017

Compliant labelling in the palm of your hand

Ensuring compliance with electrical regulations is critical for electrical installers/contractors. The P-touch E110 produces durable labels ideal for identification of plug and switch faceplates, cables, conduits and consumer units.

Common labelling tasks can be completed easily thanks to the dedicated quick-access buttons and the standard PC keyboard layout. With 200 symbols to choose from several categories including electrical, datacom and audio/video, customise your labels as needed using the easy-to-read graphic LCD.

As many installations use numbers to identify plugs, switches and faceplates, the dedicated numeric keyboard means you can type with one finger. And the serialise function lets you print multiple labels while automatically incrementing the number, such as A001, A002, A003.

Also available as a value pack, that additionally includes an AC adapter and durable carry case.

PT-E110 SPECIFICATIONS

General

Carton contents (PT-E110)	PT-E110 labelling machine 12mm TZe black on white tape cassette (4m) Documentation
Carton contents (PT-E110VP)	PT-E110 labelling machine 9mm TZe black on white tape flexible ID tape cassette (8m) AC adapter Carry case Documentation
